# ABclonal®

## **Recombinant Human UBE2D3 Protein**

Catalog No.: RP00012 Recombinant

## **Sequence Information**

Species Gene ID Swiss Prot <I>E. 7323 P61077 coli</I>

Tags C-His

**Synonyms** 

UBE2D3;E2(17)KB3;UBC4/5;UBCH5C

## **Product Information**

Source Purification
<I>E. coli</I> > 95% by SDS-PAGE.

## **Endotoxin**

 $< 0.1 \; \text{EU/}\mu\text{g}$  of the protein by LAL method.

#### **Formulation**

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

#### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## **Background**

The modification of proteins with ubiquitin is an important cellular mechanism for targeting abnormal or short-lived proteins for degradation. Ubiquitination involves at least three classes of enzymes: ubiquitin-activating enzymes, or E1s, ubiquitin-conjugating enzymes, or E2s, and ubiquitin-protein ligases, or E3s. This gene encodes a member of the E2 ubiquitin-conjugating enzyme family. This enzyme functions in the ubiquitination of the tumor-suppressor protein p53, which is induced by an E3 ubiquitin-protein ligase.

### **Basic Information**

#### Description

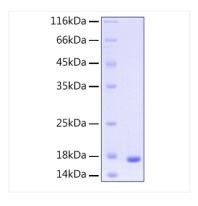

Recombinant Human UBE2D3 Protein is produced by <I>E. coli</I> expression system. The target protein is expressed with sequence (Met1-Met147) of human UBE2D3 (Accession #NP\_003331.1) fused with a 6×His tag at the C-terminus.

## **Bio-Activity**

## Storage

Store at  $-20^{\circ}$ C. Store the lyophilized protein at  $-20^{\circ}$ C to  $-80^{\circ}$ C up to 1 year from the date of receipt. <br/> <br/> After reconstitution, the protein solution is stable at  $-20^{\circ}$ C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

# **Validation Data**

Recombinant Human UBE2D3 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 17 kDa.
