Leader in Biomolecular Solutions for Life Science

Recombinant Human IL-1 alpha Protein

Catalog No.: RP00098

Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
HEK293 cells	3552	P01583

Tags

C-His

Synonyms

IL1A;IL-1A;IL1;IL1-ALPHA;IL1F1

Background

The protein encoded by this gene is a member of the interleukin 1 cytokine family. This cytokine is a pleiotropic cytokine involved in various immune responses, inflammatory processes, and hematopoiesis. This cytokine is produced by monocytes and macrophages as a proprotein, which is proteolytically processed and released in response to cell injury, and thus induces apoptosis. This gene and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. It has been suggested that the polymorphism of these genes is associated with rheumatoid arthritis and Alzheimer's disease.

Basic Information

Product Information

Source	Purification
HEK293 cells	≥ 95 % as determined by SDS-PAGE.

Endotoxin

< 0.1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Description

Recombinant Human IL-1 alpha Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Ser113-Ala271) of human IL-1 alpha/IL1A/IL1F1 (Accession #NP_000566.3) fused with a 6×His tag at the C-terminus.

Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized Recombinant Human IL1A at 5 μg/mL (100 μL/well) can bind recombinant Human IL1R2, the ED₅₀ of Human IL1R2 is 2.18 μg/mL.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

* For your safety and health, please wear a lab coat and disposable gloves when handling.

Validation Data

Recombinant Human IL-1 alpha Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

Immobilized Recombinant Human IL1A at 5μg/mL (100μL/well) can bind recombinant Human IL1R2,the ED₅₀ of Human IL1R2 is 2.18μg/mL.
