Leader in Biomolecular Solutions for Life Science

# Recombinant Human CNTFR-alpha Protein

Catalog No.: RP00242

Recombinant

## Sequence Information

Species	Gene ID	Swiss Prot
HEK293 cells	1271	P26992

### Tags

C-His

### Synonyms

CNTRF

## Product Information

Source	Purification
HEK293 cells	> 95% by SDS-PAGE.

### Endotoxin

< 0.1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

CNTRF is a member of the cytokine family. It is a polypeptide hormone that have functions in promoting neurotransmitter synthesis and neurite outgrowth in certain neuronal populations. Its actions appear to be restricted to the nervous system. Ciliary neurotrophic factor (CNTRF) has biological effects through the activation of a multi- subunit receptor complex, consisting of an extracellular CNTRF binding subunit (CNTRFα) and two transmembrane signal transduction proteins: glycoprotein gp130 and LIF receptor. CNTRF is considered as a potent survival factor of neurons and oligodendrocytes and may be relevant in reducing tissue destruction during inflammatory attacks. CNTRF also is a survival factor for neurons of the peripheral sensory sympathetic and ciliary ganglia.

## Basic Information

### Description

Recombinant Human CNTFR-alpha Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Gln 23 - Pro 346 ) of human CNTFR R alpha (Accession #NP\_001833.1) fused with a 6×His tag at the C-terminus.

### Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized Recombinant Human CNTFR at 3 μg/mL (100 μL/well) can bind Recombinant Human CNTRF with a linear range of 0.078-6.3 μg/mL.

### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

# Validation Data

Recombinant Human CNTFR-alpha Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 50-70 kDa.

Immobilized Recombinant Human CNTFR at 3µg/mL (100µL/well) can bind Recombinant Human CNTF with a linear range of 0.078-6.3µg/mL.
