Leader in Biomolecular Solutions for Life Science

Recombinant Mouse TNFSF4/OX40 ligand/CD252 Protein

Catalog No.: RP00713 **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
HEK293 cells	22164	P43488

Tags

N-His

Synonyms

Tumor necrosis factor ligand superfamily member 4; TNFSF4; CD134 ligand; CD134L; CD252; CD252 antigen; OX40 antigen ligand; OX40 ligand; OX40L; TAX transcriptionally-activated glycoprotein 1; tumor necrosis factor (ligand) superfamily member 4; Tnfsf4

Product Information

Source	Purification
HEK293 cells	> 95% by SDS-PAGE.

Endotoxin

< 1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.2 μm filtered solution of PBS, pH7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

OX40 ligand (OX40L), also called CD252, is a single-pass type II membrane protein of the TNF/TNF receptors superfamily. OX40L is expressed by DCs, macrophages and B cells and signals via its cognate receptor OX40 which is mainly expressed on APCs. OX40L/OX40 interactions are important in T-cell activation and survival and for the generation of memory T cells from activated effector T cells. OX40L – OX40 co-stimulation leads to activation of TNF receptor associated factor (TRAF) 2, 3 and 5. This pathway has been shown to prolong the survival of effector CD4⁺ Th cells as well as contributes to generation of memory T cells.

Basic Information

Description

Recombinant Mouse TNFSF4/OX40 Ligand Protein is produced by Human Cells expression system. The target protein is expressed with sequence (Ser51-Leu198) of mouse TNFSF4/OX40 Ligand (Accession #P43488) fused with an 8×His tag at the N-terminus.

Bio-Activity

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Mouse TNFSF4/OX40 ligand/CD252 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
