# Recombinant Human ALK-1/ACVRL1 Protein

Catalog No.: RP00978

Recombinant

## Sequence Information

Species	Gene ID	Swiss Prot
HEK293 cells	94	P37023

### Tags

C-His

### Synonyms

ACVRL1; ACVRLK1; ALK-1; ALK1; HHT; HH  
T2; ORW2; SKR3; TSR-I; ALK-1; ALK1;  
HHT; HHT2; ORW2; SKR3; TSR-I

## Product Information

Source	Purification
HEK293 cells	> 95% by SDS- PAGE.

### Endotoxin

Please contact us for more  
information.

### Formulation

Lyophilized from a 0.22 µm filtered  
solution of PBS, pH 7.4. Contact us for  
customized product form or  
formulation.

### Reconstitution

Centrifuge the vial before opening.  
Reconstitute to a concentration of  
0.1-0.5 mg/mL in sterile distilled water.  
Avoid vortex or vigorously pipetting  
the protein. For long term storage, it is  
recommended to add a carrier protein  
or stabilizer (e.g. 0.1% BSA, 5% HSA,  
10% FBS or 5% Trehalose), and aliquot  
the reconstituted protein solution to  
minimize free-thaw cycles.

## Background

This protein is a type I cell-surface receptor for the TGF-beta superfamily of ligands. It shares with other type I receptors a high degree of similarity in serine-threonine kinase subdomains, a glycine- and serine-rich region (called the GS domain) preceding the kinase domain, and a short C-terminal tail. The protein, sometimes termed ALK1, shares similar domain structures with other closely related ALK or activin receptor-like kinase proteins that form a subfamily of receptor serine/threonine kinases.

## Basic Information

### Description

Recombinant Human ALK-1 Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Asp22-Gln118) of human ALK-1 (Accession #NP\_000011.2) fused with a 6×His tag at the C-terminus.

### Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized Human ALK-1 at 4 µg/mL (100 µL/well) can bind Human ACVR2B with a linear range of 0.08-2.4 µg/mL.

### Storage

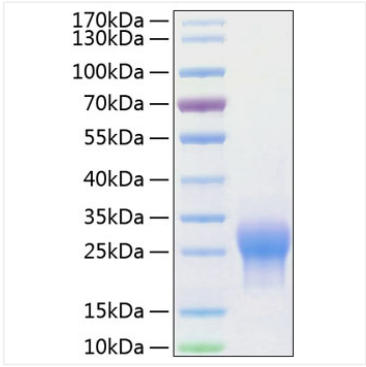

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

# Validation Data

Recombinant Human ALK-1/ACVRL1 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 25-30 kDa.

Immobilized Human ALK-1 at 4µg/mL (100 µL/well) can bind Human ACVR2B with a linear range of 0.08-2.4µg/mL.
