# Recombinant Mouse MMP-9 Protein

Catalog No.: RP01224 **Recombinant**

## Sequence Information

| Species      | Gene ID | Swiss Prot |
|--------------|---------|------------|
| HEK293 cells | 17395   | P41245     |

### Tags

C-His

### Synonyms

92 kDa gelatinase;92 kDa type IV collagenase;GELB;MMP9;MMP-9;CLG4 B;MMP9

## Product Information

| Source       | Purification       |
|--------------|--------------------|
| HEK293 cells | > 97% by SDS-PAGE. |

### Endotoxin

< 0.1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of 50mM Tris,10mM CaCl<sub>2</sub>,150mM NaCl, pH 7.5Contact us for customized product form or formulation.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

## Basic Information

### Description

Recombinant Mouse MMP-9 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Ala20-Pro730) of mouse MMP-9 (Accession #NP\_038627.1.) fused with a 6×His tag at the C-terminus.

### Bio-Activity

Measured by its ability to cleave the fluorogenic peptide substrate Mca-PLGL-Dpa-AR-NH<sub>2</sub>. The specific activity is >1900 pmol/min/μg.

### Storage

Store at -20°C.Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. <br/>After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

## Validation Data

---

Recombinant Mouse MMP-9 Protein was resolved with SDS PAGE under reducing (R) and non-reducing (NR) conditions, showing single bands at 100 kDa and 200 kDa, respectively.
