

# TNF Receptor 2 & Fc fragment Region (human IgG1) Protein

Catalog No.: YR0143

# **Basic Information**

## **Molecular Weight**

## **Endotoxin**

<1EU/mg (<0.001EU/µg)Determined by LAL gel clotting assay

#### Sterility

0.2 µm filtration

## **Aggregation**

<5% Determined by SECP

#### **Purity**

>95% Determined by SDS-PAGE

# **Background**

Etanercept, a fusion protein of the soluble TNF receptor 2 and a Fc fragment (human IgG1 isotype). Etanercept can be used to treat autoimmune diseases by interfering with tumor necrosis factor (TNF), a soluble inflammatory cytokine, by acting as a TNF inhibitor. TNF alpha is the "master regulator" of the inflammatory (immune) response in many organ systems. Autoimmune diseases are caused by an overactive immune response. Etanercept has the potential to treat these diseases by inhibiting TNF alpha. Etanercept binds to TNF alpha and decreases its role in disorders involving excess inflammation in humans and other animals, including autoimmune diseases such as ankylosing spondylitis, juvenile rheumatoid arthritis, psoriasis, psoriatic arthritis, rheumatoid arthritis, and, potentially, in a variety of other disorders mediated by excess TNF alpha.

# **Reported Applications**

ELISA, neutralization, function al assays such as bioanalytical PK and ADA assays, and those assays for studying biological pathways

# **Immunogen Information**

Clone

Isotype

Etanercept Biosimilar

Human IgG1 Fc

## **Immunogen**

# RecommendedIsotype Control(s)

In Vivo Grade Recombinant Human IgG1 Fc Protein

## **Recommended Dilution Buffer**

1×PBS pH 7.1 to 7.7

## **Contact**

€

www.abclonal.com

## **Product Information**

## **Production**

## **Purification**

Purified from cell culture supernatant in an Protein A or G purification animal-free facility

#### Storage

Store at 2 - 8°C. 2 - 8°C for up to 4 weeks and -80°C for long term storage (Avoid repeated freezing and thawing)
