## **GASP1 Ab**

Cat.#: AF0712 Concn.: 1mg/ml Mol.Wt.: 156kDa Size: 100ul,200ul Source: Rabbit Clonality: Polyclonal

Application: IHC 1:50-1:200 IF/ICC 1:100-1:500

Reactivity: Human

Purification: The antiserum was purified by peptide affinity

chromatography using SulfoLink™ Coupling Resin (Thermo

Fisher Scientific).

Specificity: GASP1 Ab detects endogenous levels of GASP1.

Immunogen: A synthesized peptide derived from human GASP1.

Uniprot: Q5|Y77

Description: GPRASP1 May modulate lysosomal sorting and functional

down- regulation of a variety of G-protein coupled receptors. Targets receptors for degradation in lysosomes. Belongs to the GPRASP family. Interacts with cytoplasmic tails of a variety of G- protein coupled receptors such as D2 dopamine

receptor/DRD2, delta opioid receptor/OPRD1, beta-2 adrenergic receptor/ADRB2 and D4 dopamine

receptor/DRD4.

Subcellular Location: Cytoplasm.

Tissue Specificity: Expressed in the brain, with lower expression in medulla,

spinal cord and substantia nigra.

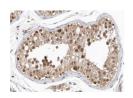

Similarity: Belongs to the GPRASP family.

Storage Condition and

Buffer:

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20

°C.Stable for 12 months from date of receipt.

AF0712 at 1/100 staining human testis tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

## Affinity Biosciences website:www.affbiotech.com order:order@affbiotech.com

AF0712 staining Hela by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary Ab was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary Ab.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween020 at  $4^{\circ}$ C with gentle shaking, overnight.
