

Phospho-APC(Ser2054) Ab

Cat.#: AF0825 Size: 100ul,200ul	Concn.: 1mg/ml Source: Rabbit	Mol.Wt.: 311kDa Clonality: Polyclonal
Application:	WB 1:500-1:2000 IHC 1:50-1:200, IF/ICC 1:100-1:500	
Reactivity:	Human	
Purification:	The Ab is from purified rabbit serum by affinity purification via sequential chromatography on phospho- and non-phospho-peptide affinity columns.	
Specificity:	Phospho-APC(Ser2054) Ab detects endogenous levels of APC only when phosphorylated at Sersine 2054.	
Immunogen:	A synthesized peptide derived from human APC around the phosphorylation site of Sersine 2054.	
Uniprot:	P25054	
Description:	This gene encodes a tumor sup among its many intracellular fu Defects in this gene cause fami (FAP), an autosomal dominant p usually progresses to malignan mutations tend to be clustered the mutation cluster region (MC protein product.	nctions one of nuclear export. lial adenomatous polyposis ore-malignant disease that cy. Disease-associated in a small region designated
Subcellular Location:	Cell junction > adherens junctio cytoskeleton. Cell projection > > ruffle membrane. Cytoplasm. with the microtubule network a microtubules. Accumulates in th membrane in response to hepa treatment. The MEMO1-RHOA-D controls localization of the phose membrane.	lamellipodium. Cell projection Cell membrane. Associated t the growing distal tip of he lamellipodium and ruffle tocyte growth factor (HGF) DIAPH1 signaling pathway
Tissue Specificity:	Expressed in a variety of tissue colon, thymus, skeletal muscle, ovary, testis kidney, placenta, t (PubMed:21643010, PubMed:27 strongly expressed in brain but levels in other tissues (PubMed PubMed:21643010, PubMed:27 Predominant form in all tissues gastric mucosa and blood (Publ PubMed:21643010, PubMed:27	heart, prostate, lung, spleen, blood and liver 7217144). Isoform 1A: Very has relatively low expression :19527921, 217144). Isoform 1B: except for brain, including Med:19527921,

research together	order:order@affbiotech.com
Similarity:	The microtubule tip localization signal (MtLS) motif; mediates interaction with MAPRE1 and targeting to the growing microtubule plus ends.Belongs to the adenomatous polyposis coli (APC) family.
Storage Condition and Buffer:	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.Store at -20 °C.Stable for 12 months from date of receipt.

Western blot analysis on HuvEc cell lysate using Phospho-APC(Ser2054) Ab,The lane on the left is treated with the antigen-specific peptide.

AF0825 at 1/100 staining human Rectum tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF0825 staining HuvEc by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary Ab was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary Ab.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween®20 at 4°C with gentle shaking, overnight.
