

## Phospho-SGK1 (Ser422) Ab

| Cat.#: AF3001<br>Size: 100ul,200ul | Concn.: 1mg/ml<br>Source: Rabbit  | Mol.Wt.: 54kDa<br>Clonality: Polyclonal |
|------------------------------------|---|---|
| Application:                       | WB 1:500-1:2000 IHC 1:50-1:1000, IF/ICC 1:100-1:500   |   |
| Reactivity:                        | Human,Mouse,Rat   |   |
| Purification:                      | The Ab is from purified rabbit serum by affinity purification via sequential chromatography on phospho- and non-phospho-peptide affinity columns.   |   |
| Specificity:                       | Phospho-SGK1 (Ser422) Ab detects endogenous levels of SGK only when phosphorylated at Serine 422.   |   |
| lmmunogen:                         | A synthesized peptide derived from human SGK1 around the phosphorylation site of Serine 422.  |   |
| Uniprot:                           | O00141  |   |
| Description:                       | This gene encodes a serine/threonine protein kinase that is<br>highly similar to the rat serum-and glucocorticoid-induced<br>protein kinase (SGK). This gene was identified in a screen of<br>hepatocellular genes regulated in response to cellular<br>hydration or swelling. Cellular hydration is a catabolic signal,<br>stimulating glycogenolysis and proteolysis, and inhibiting<br>protein and glycogen synthesis. |   |
| Subcellular Location:              | Cell membrane and Cytoplasm. Nucleus. Endoplasmic reticulum. Nuclear, upon phosphorylation.   |   |
| Tissue Specificity:                | Expressed in most tissues with highest levels in the<br>pancreas, followed by placenta, kidney and lung. Isoform 2<br>is strongly expressed in brain and pancreas, weaker in heart,<br>placenta, lung, liver and skeletal muscle.   |   |
| Similarity:                        | Isoform 2 subcellular localization at the cell membrane and<br>resistance to proteasomal degradation is mediated by the<br>sequences within the first 120 amino acids.Belongs to the<br>protein kinase superfamily. AGC Ser/Thr protein kinase<br>family.   |   |
| Storage Condition and<br>Buffer:   | Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM<br>NaCl, 0.02% sodium azide and 50% glycerol.Store at -20<br>°C.Stable for 12 months from date of receipt.  |   |

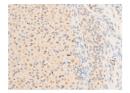

Western blot analysis of Phospho-SGK (Ser422) expression in various lysates

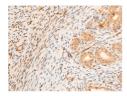

Western blot analysis of SGK phosphorylation expression in Insulin treated HeLa whole cell lysates, The lane on the left is treated with the antigen-specific peptide.

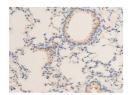

AF3001 at 1/100 staining rat intestinal tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3001 at 1/100 staining rat ovarian tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3001 at 1/100 staining rat uterine tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

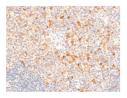

AF3001 at 1/100 staining mouse lung tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

Affinity Biosciences website:www.affbiotech.com order:order@affbiotech.com

AF3001 at 1/100 staining mouse testis tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

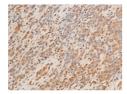

AF3001 at 1/100 staining mouse spleen tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

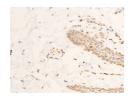

AF3001 at 1/100 staining mouse gastric tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3001 at 1/100 staining human TB tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3001 at 1/100 staining human appendiceal tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat antirabbit Ab was used as the secondary.

AF3001 at 1/100 staining human skin tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3001 staining HeLa by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary Ab was diluted at 1/200 and incubated with the sample for 1 hour at 37°C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary Ab.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween®20 at 4°C with gentle shaking, overnight.
