Phospho-CaMKK2 (Ser511) Ab

Cat.#: AF4487 Concn.: 1mg/ml Mol.Wt.: 68kDa Size: 50ul,100ul,200ul Source: Rabbit Clonality: Polyclonal

Application: WB 1:500-1:2000

Reactivity: Human, Mouse, Rat

Purification: The Ab is from purified rabbit serum by affinity purification

via sequential chromatography on phospho- and non-

phospho-peptide affinity columns.

Specificity: Phospho-CaMKK2 (Ser511) Ab detects endogenous levels of

CaMKK2 only when phosphorylated at Ser511.

Immunogen: A synthesized peptide derived from human CaMKK2 around

the phosphorylation site of Ser511.

Uniprot: Q96RR4

Subcellular Location: Cytoplasm.

Tissue Specificity: Ubiquitously expressed with higher levels in the brain.

Intermediate levels are detected in spleen, prostate, thyroid

and leukocytes. The lowest level is in lung.

Similarity: The autoinhibitory domain overlaps with the calmodulin

binding region and may be involved in intrasteric autoinhibition. The RP domain (arginine/proline-rich) is involved in the recognition of CAMKI and CAMK4 as substrates. Belongs to the protein kinase superfamily.

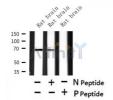

Ser/Thr protein kinase family.

Storage Condition and

Buffer:

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20

°C.Stable for 12 months from date of receipt.

Western blot analysis of Phospho-CaMKK2 (Ser511) in lysates of Rat brain, using Phospho-CaMKK2 (Ser511) Ab(AF4487).

overnight.

For Research Use Only. Not for use in diagnostic and therapeutic procedures. Not for resale without express authorization.
