

PERFORMANCE DATA SHEET

1816

*Monoclonal anti-human CD25(IL2-R alpha, TAC)/APC**

mAb name/Clone: 7G7B6

Isotype: Mouse IgG2ak

Immunogen: Stimulated PBMC

CATALOG#: 174-060

QUANTITY: 120 tests

VOLUME IN VIAL: 0.2 ml

WORKING DILUTION: 1:50 (or use 1.6µl of concentrated stock per 5×10^5 -cell test)

INFORMATION: Expression of human CD25 (the alpha subunit of the IL-2 receptor complex) is dramatically upregulated on activated T cells, B cells, NK cells and macrophages (3). Antibodies to CD25 are being studied for potential use as an immunodirected therapy to selectively attack (kill) CD25 expressing cells (4). Antibody 7G7B6 recognizes epitope B of the IL-2 alpha receptor of about 55 kd (1,6). Antibody 7G7B6 does not block IL-2 binding to its receptor (1).

STORAGE CONDITIONS: *Store at 2 - 5°C. Do not freeze! Protect from light.*

PRODUCT STABILITY: Product should retain activity for at least 12 months after shipping date when stored as recommended. Ship Date: _____

BUFFER: 50 mM Sodium Phosphate pH 7.5, 500 mM Potassium Chloride, 150mM NaCl, 15% Glycerol, 0.2% BSA, 0.04% NaN₃ (as a preservative).

PRODUCTION: Protein A purified antibody from tissue culture supernatant was conjugated to R-Phycoerythrin through a sulfo-ester linkage. Unconjugated antibody was removed using size exclusion chromatography. Antibody conjugate is at **0.25 mg/ml** with an A₆₅₀/A₂₈₀ ratio of 1.48.

PERFORMANCE: Cultured human CEM were stimulated overnight in the presence of PMA (10ng/ml) and ionomycin (1µM). Five x 10⁵ cells per tube were incubated 45 minutes on ice with 80 µl of anti-CD25/R-PE at a dilution factor of 1:50 (5 µg/ml). Cells were washed three times, fixed and analyzed by FACS. Cells stained positive with a mean shift of **1.24** log₁₀ fluorescent units when compared to a Mouse IgG1/APC negative control (Catalog #278-060) at a similar concentration. Binding was blocked when cells were pre incubated 10 minutes with 20 µl of 0.5 mg/ml anti-CD25 antibody (Catalog #174-020).

***This Product is intended for Laboratory Research use only.** Allophycocyanin (APC) is covered under patents: U.S. 4,520,110; European 76,695 and Canadian 1,179,942.
