

## Mouse Anti-Human VEGFR-2/KDR

### ORDERING INFORMATION

|                          |                                    |
|--------------------------|------------------------------------|
| <b>Catalog Number:</b>   | 101-MBi32                          |
| <b>Size:</b>             | 50 µg                              |
| <b>Formulation:</b>      | Monoclonal Antibody; Lyophilized   |
| <b>Clone/AB feature:</b> | (#3(4H3))                          |
| <b>Antigen:</b>          | RHu soluble extracellular KDR (D7) |
| <b>Application:</b>      | WB, FC, E, IHC                     |
| <b>Stabilizer:</b>       | None                               |
| <b>Buffer:</b>           | PBS pH 7.4 w/o preservative        |

### *Description:*

VEGF R1 (Flt-1), VEGF R2 (KDR/Flk-1), and VEGF R3 (Flt-4) belong to the class III subfamily of receptor tyrosine kinases (RTKs). All three receptors contain seven immunoglobulin-like repeats in their extracellular domain and kinase insert domains in their intracellular region. They are best known for regulating VEGF family-mediated vasculogenesis, angiogenesis, and lymphangiogenesis. They are also mediators of neurotrophic activity and regulators of hematopoietic development. Human VEGF R2 is thought to be the primary inducer of VEGF-mediated blood vessel growth, while VEGF R3 plays a significant role in VEGF-C and VEGF-D-mediated lymphangiogenesis.

### *Reconstitution:*

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

### *Stability:*

The lyophilized antibody is stable at room temperature for up to 1 month. The reconstituted antibody is stable for at least two weeks at 2-8 °C. Frozen aliquots are stable for at least 6 months when stored at -20 °C. **Avoid repeated freeze-thaw cycles!**

*Optimal dilutions should be determined by each laboratory for each application.*

The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users!

**This product is sold for Research Use Only !**
