

Monoclonal anti-human MMP-3

ORDERING INFORMATION

Catalog No:	hAP-0021
Size:	100 µg
Storage:	< -20° C
Immunogen:	human recombinant MMP-3
Ig Type:	mouse IgG1
Clone:	MM0021-3E44
Applications:	Western blot & Immunohistochemistry

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with purified human recombinant MMP-3).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500 µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human MMP-3 in western blot without cross reactivity with other human MMPs. Reactivity to MMP-3 of other species is not tested.

Applications:

1. Western blotting:	Yes	(1:500-1000)
2. Immunohistochemistry (Formalin/Paraffin)	Yes	(1:200-400)

Formalin fixed and paraffin embedded normal human placenta tissue is subjected to mouse anti human MMP-3 (hAP-0021)

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
