Rat anti-human TNFRSF17/(BCMA)

ORDERING INFORMATION

Catalog No:	hAP-0108
Size:	100 µg
Storage:	< -20° C
Immunogen:	Human recombinant TNFRSF17 (EC domain)
Ig Type:	Rat IgG2
Clone:	MM0108-3D44
Applications:	WB and Blocking

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a Rat immunized with **human recombinant protein of the extracellular domain of TNFRSF17 (BCMA)**).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to detect human TNFRSF17 protein.

Applications:

- | | | | |
|----|-----------------|------------|---------------------|
| 1. | WB | Yes | (1:500-1000) |
| 2. | Blocking | | |

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
