Mouse anti-human TNFRSF10B/TRAIL R2

ORDERING INFORMATION

Catalog No:	hAP-0577
Size:	100 µg
Storage:	< -20° C
Immunogen:	Human recombinant TNFRSF10B EC domain
Ig Type:	mouse IgG1
Clone:	MM0577-10B4
Applications:	Induction of Apoptosis

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a mouse immunized with **human recombinant protein of TNFRSF10B extracellular domain (also called TRAIL R2)**).

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 200 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody was selected for its ability to detect human TNFRSF10B by direct ELISA.

Applications:

- | | |
|----------------------------------|------------|
| 1. Induction of apoptosis | Yes |
|----------------------------------|------------|

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only
