

Mouse Monoclonal anti human ARK5

ORDERING INFORMATION

Catalog No:	hAP-0964
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human ARK5
Ig Type:	Mouse IgG1
Clone:	MM0964-8W14
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human ARK5 (AMPK-related kinase 5). ARK5 is also known as NUAK1 and is a 74 kDa intracellular Ser/Thr kinase that promotes cell survival during nutrient deprivation and TNF family ligand-induced apoptosis.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human ARK5 in direct ELISAs and WBs. It cross reacts with mouse and rat ARK5 proteins in WBs.

Applications:

1.	WB	Yes	1:1000-2000
-----------	-----------	------------	--------------------

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
