

Mouse Monoclonal anti human ATG5

ORDERING INFORMATION

Catalog No:	hAP-0967
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human ATG4A
Ig Type:	Mouse IgG2
Clone:	MM0967-7Q16
Applications:	WB, IHC-P

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human ATG5 (Autophagy related protein 5). ATG5 is also called APG5L and Apoptosis-specific Protein and is a ubiquitous 32 kDa member of the ATG family of proteins.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human ATG5 in direct ELISAs and WBs. It cross reacts with mouse and rat ATG5 protein in WBs.

Applications:

1.	WB	Yes	1:1000-2000
2.	IHC-P	Yes	1:100-200

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
