

Mouse Monoclonal anti Human HIF-1alpha

ORDERING INFORMATION

Catalog No:	hAP-1016
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human HIF-1alpha
Ig Type:	Mouse IgG1
Clone:	MM1016-10T1
Applications:	WB, IHC-P and FC

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with recombinant human HIF-1alpha (Hypoxia-Inducible transcription Factor 1alpha). HIF-1alpha is the regulated member of the transcription factor heterodimer HIF-1.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500µl sterile PBS and the final concentration is 200µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human HIF-1alpha in direct ELISAs and WBs. It cross reacts with mouse and rat HIF-1alpha in WBs.

Applications:

1.	WB	Yes	1:1000-2000
2.	IHC-P	Yes	1:100-200
3.	FC	Yes	

**Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
