

Mouse Monoclonal anti Human SWAP70

ORDERING INFORMATION

Catalog No:	hAP-1105
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant human SWAP70
Ig Type:	Mouse IgG2
Clone:	MM1105-17G28
Applications:	WB

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells) from a mouse immunized with Recombinant human SWAP70 (Switch-associated protein 70). SWAP70 is a 67-70kDa intracellular protein that bears limited resemblance to members of the Dbl-family of GEFs for small Rho GTPases.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2um filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes human SWAP70 in direct ELISAs and WBs. It cross reacts with mouse SWAP70 in WBs.

Applications:

1.	WB	Yes	1:1000-2000
-----------	-----------	------------	--------------------

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
