

Polyclonal Sheep anti Human IGF-I R

ORDERING INFORMATION

| | |
|-----------------|---|
| Catalog Number: | hAP-5246 |
| Size: | 50 µg |
| Storage: | < -20 °C |
| Immunogen: | E. coli derived recombinant human IGF-I R |
| Ig Type: | IgG |
| Purification: | Antigen Affinity Purified |
| Applications: | WB IHC N/B |

Preparation:

This antibody was produced from a sheep immunized with purified human IGF-I R protein.

Formulation and Storage:

The IgG fraction of immunized serum was purified by antigen affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution:

Reconstitute the antibody with 100 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 °C for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity:

Detects human and mouse IGF-I R in direct ELISAs and Western blots. In direct ELISAs and Western blots, 25-50% cross-reactivity with recombinant mouse IGF-I R is observed. In direct ELISAs, less than 1% cross-reactivity with recombinant human IGF-II R is observed.

Applications:

| | | |
|-------------------------|-----|-----------------|
| WB | Yes | 1 : 1000 - 2000 |
| IHC (Paraffin / Frozen) | Yes | 1 : 50 - 100 |
| N / B | Yes | |

Optimal dilutions should be determined by each laboratory for each application.

The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users!
