

Polyclonal Sheep anti Human IL-1 beta/IL-1F2

ORDERING INFORMATION

Catalog Number:	hAP-5251
Size:	50 µg
Storage:	< -20 °C
Immunogen:	E. coli-derived recombinant human IL-1 beta/IL-1F2
Ig Type:	IgG
Purification:	Antigen Affinity Purified
Applications:	WB ICC N/B

Preparation:

This antibody was produced from a sheep immunized with purified human IL-1 beta/IL-1F2 protein.

Formulation and Storage:

The IgG fraction of immunized serum was purified by antigen affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution:

Reconstitute the antibody with 100 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 °C for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity:

Detects human IL-1 beta/IL-1F2 in direct ELISAs and Western blots. In direct ELISAs, approximately 30% -75% cross-reactivity with recombinant mouse IL-1 beta, recombinant porcine IL-1 beta, recombinant rat IL-1 beta, recombinant canine IL-1 beta, recombinant equine IL-1 beta, recombinant cotton rat IL-1 beta, recombinant feline IL-1 beta, recombinant rhesus monkey IL-1 beta, and recombinant guinea pig IL-1 beta is observed.

Applications:

WB	Yes	1 : 1000 - 2000
ICC	Yes	1 : 100 - 200
N / B	Yes	

Optimal dilutions should be determined by each laboratory for each application.

The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users!

This product is sold for Research Use Only !
