

Polyclonal Sheep anti Human P-Selectin/CD62P

ORDERING INFORMATION

Catalog Number:	hAP-5418
Size:	50 µg
Storage:	< -20 °C
Immunogen:	Chinese hamster ovary cell line CHO-derived recombinant human P-Selectin/CD62P
Ig Type:	IgG
Purification:	Antigen Affinity Purified
Applications:	WB N/B

Preparation:

This antibody was produced from a sheep immunized with purified human P-Selectin/CD62P protein.

Formulation and Storage:

The IgG fraction of immunized serum was purified by antigen affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution:

Reconstitute the antibody with 100 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 °C for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity:

Detects human P-Selectin/CD62P in direct ELISAs and Western blots. In direct ELISAs, approximately 5% cross-reactivity with recombinant mouse P-Selectin and recombinant rat P-Selectin is observed, and less than 1% cross-reactivity with recombinant human (rh) E-Selectin and rhL-Selectin is observed.

Applications:

WB	Yes	1 : 1000 - 2000
N / B	Yes	

Optimal dilutions should be determined by each laboratory for each application.

The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users!
