

Polyclonal Sheep anti Human TNF RII/TNFRSF1B

ORDERING INFORMATION

Catalog Number:	hAP-5515
Size:	50 µg
Storage:	< -20 °C
Immunogen:	E. coli-derived recombinant human TNF RII/TNFRSF1B
Ig Type:	IgG
Purification:	Antigen Affinity Purified
Applications:	WB FC N/B

Preparation:

This antibody was produced from a sheep immunized with purified human TNF RII/TNFRSF1B protein.

Formulation and Storage:

The IgG fraction of immunized serum was purified by antigen affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution:

Reconstitute the antibody with 100 µl sterile PBS and the final concentration is 500µg/ml. Reconstituted antibody can also be aliquoted and stored frozen at < -20 °C for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity:

Detects human TNF RII/TNFRSF1B in direct ELISAs and Western blots. In direct ELISAs, approximately 50% cross-reactivity with recombinant mouse TNF RII is observed.

Applications:

WB	Yes	1 : 1000 - 2000
N / B	Yes	
FC	Yes	

Optimal dilutions should be determined by each laboratory for each application.

The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users!
