

Rat Monoclonal anti Mouse CD2-like receptor activating cytotoxic cells (CRACC)

ORDERING INFORMATION

Catalog No:	mAP-0405
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant mouse CRACC
Ig Type:	Rat IgG2
Clone:	RM0405-9Q17
Applications:	WB and FC

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse CRACC (also called CS1, novel Ly9, SLAMF7, and CD319) which is a 66 kDa type I transmembrane glycoprotein in the SLAM subgroup of the CD2 family.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse CRACC by direct ELISAs and WBs.

Applications:

1.	WB	Yes	1:1000-2000
2.	FC	Yes	

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
