

Rat Monoclonal anti Mouse Intelectin-1

ORDERING INFORMATION

Catalog No:	mAP-0453
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant mouse Intelectin-1
Ig Type:	Rat IgG2
Clone:	RM0453-6G40
Applications:	WB and IHC-F

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse Intelectin-1 (ITLN-1, also called endothelial lectin-1 and omentin), which is a 34 kDa Ca-dependent galactofuranose-binding lectin that is not a C-type lectin.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse Intelectin-1 by direct ELISAs and WBs.

Applications:

1.	WB	Yes	1:1000-2000
2.	IHC-F	Yes	1:50-200

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
