

Rat Monoclonal anti Mouse Neuropilin-1

ORDERING INFORMATION

Catalog No:	mAP-0483
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant Mouse Neuropilin-1
Ig Type:	Rat IgG2
Clone:	RM0483-5N43
Applications:	FC and Neutralization

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse Neuropilin-1. Neuropilin-1 is also called CD304 and is a 130-140 kDa type I transmembrane (TM) glycoprotein that regulates axon guidance and angiogenesis.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse Neuropilin-1 by direct ELISAs.

Applications:

- | | | |
|----|-----------------------|------------|
| 1. | FC | Yes |
| 2. | Neutralization | Yes |

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
