

Rat Monoclonal anti Mouse R-Spondin-1

ORDERING INFORMATION

Catalog No:	mAP-0518
Size:	100µg
Storage:	<-20°C
Immunogen:	Recombinant Mouse R-Spondin-1
Ig Type:	Rat IgG2
Clone:	RM0518-26E9
Applications:	Neutralization

Preparation: This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse R-Spondin-1 (roof plate-specific spondin-1). It is also called cristin3 and is a 39 kDa, heparin-binding member of the Cristin/R-Spondin family of proteins.

Formulation and Storage: The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

Reconstitution: Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

Specificity: This antibody recognizes mouse R-Spondin-1 by direct ELISAs.

Applications:

1. Neutralization	Yes
--------------------------	------------

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
