| <b>Size:</b>         | <b>100µg</b>                              |
| <b>Storage:</b>      | <b>&lt;-20°C</b>                          |
| <b>Immunogen:</b>    | <b>Recombinant Mouse Serum Amyloid A4</b> |
| <b>Ig Type:</b>      | <b>Rat IgG2</b>                           |
| <b>Clone:</b>        | <b>RM0529-5T24</b>                        |
| <b>Applications:</b> | <b>WB</b>                                 |

**Preparation:** This antibody was produced from a hybridoma (mouse myeloma fused with spleen cells from a rat immunized with recombinant mouse Serum Amyloid A4. It is also called SAA5 and is a 14 kDa member of the SAA family of proteins.

**Formulation and Storage:** The IgG fraction of culture supernatant was purified by Protein G affinity chromatography and lyophilized from a 0.2 µm filtered solution in phosphate-buffered saline (PBS). Lyophilized samples are stable for 2 years from date of receipt when stored at -70°C.

**Reconstitution:** Reconstitute the antibody with 500ul sterile PBS and the final concentration is 200ug/ml. Reconstituted antibody can also be aliquoted and stored frozen at <-20 for at least for six months without detectable loss of activity. **Avoid repeated freeze-thaw cycles.**

**Specificity:** This antibody recognizes mouse Serum Amyloid A4 by direct ELISAs.

### **Applications:**

|                 |            |                  |
|-----------------|------------|------------------|
| <b>1. IHC-F</b> | <b>Yes</b> | <b>1:100-200</b> |
|-----------------|------------|------------------|

Final dilutions should be optimized by the end users and the dilutions provided in the data sheet are for reference only.
