

Met Proto-Oncogene Human Recombinant, GST Tag

Item Number	rAP-3624
Synonyms	Hepatocyte growth factor receptor, HGF receptor, HGF/SF receptor, Proto-oncogene c-Met, Scatter factor receptor, SF receptor, Tyrosine-protein kinase Met, MET, HGFR, AUTS9, RCCP2.
Description	MET Human Recombinant produced in E.Coli consists of 199 amino acids (18-217 a.a.) fused to a GST tag and has a total molecular mass of 50kDa (including GST). The MET is purified by proprietary chromatographic techniques.
Uniprot Accession Number	P08581
Amino Acid Sequence	
Source	Escherichia Coli.
Physical Appearance and Stability	Sterile Filtered clear solution. Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. Please avoid freeze thaw cycles.
Formulation and Purity	MET is supplied in 100µg/ml in 50mM Tris-HCl (pH7.5) with 10mM L-glutathione (reduced).
Application	
Solubility	
Biological Activity	
Shipping Format and Condition	Lyophilized powder at room temperature.

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
