

Parainfluenza Virus Type-2

Item Number rAP-5415

Synonyms

Description MA 104 cells inoculated with parainfluenza 2 virus, strain II ALTB cc 2056.

Uniprot Accession Number

Amino Acid Sequence

Source

Physical Appearance and Stability Sterile Filtered colorless solution. Parainfluenza type-2 although stable 4°C for 4 weeks, should be stored below -18°C. Please prevent freeze-thaw cycles.

Formulation and Purity The Parainfluenza type-2 solution contains STE, 0.02% sodium azide (NaN₃). Greater than 90.0% as determined by Analysis by SDS-PAGE.

Application

Solubility

Biological Activity

Shipping Format and Condition Lyophilized powder at room temperature.

Optimal dilutions should be determined by each laboratory for each application. The listed dilutions are for recommendation only and the final conditions should be optimized by the ender users! This product is sold for **Research Use Only**
