

Mouse Monoclonal Antibody to TFAP2A

Catalogue Number	sAP-1132
Target Molecule	Name: TFAP2A Aliases: AP-2; BOFS; AP2TF; TFAP2; AP-2alpha MW: 48kDa Entrez Gene ID: 7020
Description	The protein encoded by this gene is a transcription factor that binds the consensus sequence 5'-GCCNNNGGC-3'. The encoded protein functions as either a homodimer or as a heterodimer with similar family members. This protein activates the transcription of some genes while inhibiting the transcription of others. Defects in this gene are a cause of branchiooculofacial syndrome (BOFS). Three transcript variants encoding different isoforms have been found for this gene.;
