

## Antibodies Product Datasheet

|                               |                                                                                       |
|-------------------------------|---------------------------------------------------------------------------------------|
| <b>Product Name:</b>          | IFN- $\gamma$ Monoclonal Antibody                                                     |
| <b>Catalog Number:</b>        | N0353                                                                                 |
| <b>Reactivity:</b>            | Human                                                                                 |
| <b>Applications:</b>          | WB, ELISA                                                                             |
| <b>Dilutions:</b>             | Western Blot: 1/500 - 1/2000. ELISA: 1/10000. Not yet tested in other applications.   |
| <b>Modification:</b>          | Unmodified/ Total                                                                     |
| <b>Source:</b>                | Monoclonal Mouse                                                                      |
| <b>Purification:</b>          | Affinity purification                                                                 |
| <b>Immunogen:</b>             | Recombinant human IFN- $\gamma$ (BioSource company, Cat.No. PHC4033)                  |
| <b>Concentration:</b>         | 1 mg/ml                                                                               |
| <b>Gene Name:</b>             | IFNG                                                                                  |
| <b>Protein Name:</b>          | Interferon gamma                                                                      |
| <b>Other Name:</b>            | IFNG; Interferon gamma; IFN-gamma; Immune interferon                                  |
| <b>Human Swiss Prot No.:</b>  | P01579                                                                                |
| <b>Formulation:</b>           | Purified antibody in PBS containing 0.03% sodium azide.                               |
| <b>Specificity:</b>           | IFN- $\gamma$ Monoclonal Antibody detects endogenous levels of IFN- $\gamma$ protein. |
| <b>Storage and Stability:</b> | -20°C/1 year                                                                          |
