

Anti-IkB-Alpha (phospho-Y42) NFKBIA Antibody

Catalog Number: A01139Y42

About NFKBIA

This protein mediates the voltage-dependent sodium ion permeability of excitable membranes. Assuming opened or closed conformations in response to the voltage difference across the membrane, the protein forms a sodium-selective channel through which Na⁺ ions may pass in accordance with their electrochemical gradient. This sodium channel may be present in both denervated and innervated skeletal muscle.
