

Anti-HIPK2 Antibody

Catalog Number: A01371-1

About HIPK2

This gene encodes a conserved serine/threonine kinase that is a member of the homeodomain-interacting protein kinase family. The encoded protein interacts with homeodomain transcription factors and many other transcription factors such as p53, and can function as both a corepressor and a coactivator depending on the transcription factor and its subcellular localization. Multiple transcript variants encoding different isoforms have been found for this gene.

Overview

Product Name	Anti-HIPK2 Antibody
Reactive Species	Human, Mouse
Description	Boster Bio Anti-HIPK2 Antibody catalog # A01371-1. Tested in WB, ELISA applications. This antibody reacts with Human, Mouse.
Application	ELISA, WB
Clonality	Polyclonal
