

Anti-TrkCT1 NTRK3 Antibody

Catalog Number: A02502

About NTRK3

This antibody is suitable for Cancer, Immunology and Nuclear Signaling research. TrkCT1, also named neurotrophic tyrosine kinase receptor type 3 (Ntrk3) non-catalytic isoform 2, is a non-catalytic isoform of TrkC, the high affinity receptor for Neurotrophin-3 (NT-3). This isoform lacks the kinase domain that is responsible for signaling by the full-length isoform. TrkCT1 is the product of an alternative splicing of Ntrk3 that leaves the extracellular and transmembrane domains intact but includes a shorter intracellular domain encoded by exons 13b and 14b. Recent studies indicate that the short cytoplasmic tail binds the scaffold protein Tamalin in a ligand-dependent manner and further activates the Arf6-Rac1 signaling pathway. Isoform 3 transcripts are readily detected early during embryogenesis and are expressed predominantly in adult brain and gonads.

Overview

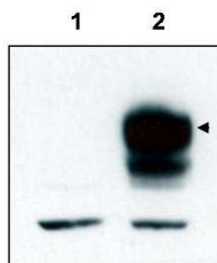

Product Name	Anti-TrkCT1 NTRK3 Antibody
Reactive Species	Human, Mouse
Description	Boster Bio Anti-TrkCT1 NTRK3 Antibody (Catalog # A02502). Tested in ELISA, IP, WB applications. This antibody reacts with Human, Mouse.
Application	ELISA, IP, WB
Clonality	Polyclonal
Formulation	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 0.01% (w/v) Sodium Azide
Storage Instructions	Store vial at -20°C prior to opening. Aliquot contents and freeze at -20°C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4°C as an undiluted liquid. Dilute only prior to immediate use. Expiration date is one (1) year from date of opening. (Ship on dry ice.)
Host	Rabbit
Uniprot ID	Q6VNS1

Technical Details

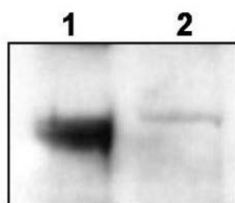

Immunogen	This affinity purified antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding to amino acids near the carboxyl terminus of mouse TrkCT1 protein.
Predicted Reactive Species	Bovine, Pufferfish, Zebrafish
Isotype	IgG
Form	Liquid (sterile filtered)

Concentration	1.0 mg/mL by UV absorbance at 280 nm
Purification	This affinity purified antibody is directed against mouse TrkCT1 protein. The product was affinity purified from monospecific antiserum by immunoaffinity chromatography. A BLAST analysis was used to suggest cross-reactivity with TrkCT1 protein from human, mouse and rat based on 100% homology with the immunizing sequence. Reactivity against homologues from other sources is not known.
Suggested Dilutions	<p>Dilute the sample so that the expected range of concentrations fall within the detection range of this kit.</p> <p>If the expected range of concentration is unknown, a pilot test should be conducted to decide the optimal dilution ratio for your samples.</p> <p>Some PubMed article(s) citing the expression level of this target are as follows:</p> <p>Boster Bio's internal QC testing used:</p> <p>ELISA: 1:5,000 - 1:20,000</p> <p>IP: 1 ug</p> <p>WB: 1:1,000 - 1:10,000</p>

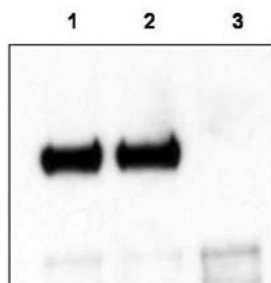

Anti-TrkCT1 NTRK3 Antibody (A02502) Images

Western blot analysis of TrkCT1 expression in non-transfected control (lane 1) and HEK293 cells (Lane 2). TrkCT1 was detected using rabbit anti-TrkCT1 Antigen Affinity purified polyclonal antibody (Catalog # A02502) at 1:3000. Personal Communication, V. Coppola, CCR-NCI, Frederick, MD.

Western blot analysis of TrkCT1 expression in mouse cortex lysate (lane 1) and TrkCT1 knock-out cortex lysate (Lane 2). TrkCT1 was detected using rabbit anti-TrkCT1 Antigen Affinity purified polyclonal antibody (Catalog # A02502) at 1:6000. Personal Communication, V. Coppola, CCRNCI, Frederick, MD.

Mouse cortex lysate was immunoprecipitated with anti-TrkCT1 antibody and further blotted with affinity purified anti-TrkCT1. Lane 1 is wild-type cortex lysate, Lane 2 is Tamalin knock-out cortex lysate, and Lane 3 is TrkCT1 knock-out cortex lysate. The membrane was probed with the primary antibody at a 1:6000 dilution. Personal Communication, V. Coppola, CCR-NCI, Frederick, MD.
