

Anti-ELOA3 TCEB3C Antibody

Catalog Number: A14654

About TCEB3C

SIIL, also known as elongin, is a general transcription elongation factor that increases the RNA polymerase II transcription elongation past template-encoded arresting sites. Subunit A3 is transcriptionally active but its transcription activity is not enhanced by binding to the dimeric complex of the SIIL regulatory subunits B and C (elongin BC complex).
