

## Anti-SP1 Rabbit Monoclonal Antibody

Catalog Number: M00110

### About SP1

Phosphoinositide-3-kinase (PI3K) that phosphorylates PtdIns (Phosphatidylinositol), PtdIns4P (Phosphatidylinositol 4-phosphate) and PtdIns (4,5) P2 (Phosphatidylinositol 4,5-bisphosphate) to generate phosphatidylinositol 3,4,5-trisphosphate (PIP3) . PIP3 plays a key role by recruiting PH domain-containing proteins to the membrane, including AKT1 and PDK1, activating signaling cascades involved in cell growth, survival, proliferation, motility and morphology. Participates in cellular signaling in response to various growth factors.

### Overview

|                      |                                                                                                                                            |

| Product Name         | Anti-SP1 Rabbit Monoclonal Antibody                                                                                                        |
| Reactive Species     | Human                                                                                                                                      |
| Description          | Boster Bio Anti-SP1 Rabbit Monoclonal Antibody catalog # M00110. Tested in WB, IHC, ICC/IF applications. This antibody reacts with Human.  |
| Application          | IF, IHC, ICC, WB                                                                                                                           |
| Clonality            | Monoclonal AOOC-19                                                                                                                         |
| Formulation          | Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.                        |
| Storage Instructions | Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles. |
| Host                 | Rabbit                                                                                                                                     |
| Uniprot ID           | P08047                                                                                                                                     |

| Immunogen           | A synthesized peptide derived from human SP1                                                                                                                                                                                                                                                                                                   |
| Isotype             | Rabbit IgG                                                                                                                                                                                                                                                                                                                                     |
| Form                | Liquid                                                                                                                                                                                                                                                                                                                                         |
| Concentration       | Actual concentration vary by lot. Use suggested dilution ratio to decide dilution procedure.                                                                                                                                                                                                                                                   |
| Purification        | Affinity-chromatography                                                                                                                                                                                                                                                                                                                        |
| Suggested Dilutions | Dilute the sample so that the expected range of concentrations fall within the detection range of this kit.<br>If the expected range of concentration is unknown, a pilot test should be conducted to decide the optimal dilution ratio for your samples.<br>Some PubMed article(s) citing the expression level of this target are as follows: |

Boster Bio's internal QC testing used:

WB 1:500-1:2000

IHC 1:50-1:200

ICC/IF 1:50-1:200

## Anti-SP1 Rabbit Monoclonal Antibody (M00110) Images

All lanes use the Antibody at 1:1K dilution for 1 hour at room temperature.

Western blot analysis of SP1 expression in HeLa cell lysate.
