

## Human TGF-beta RII Recombinant Protein

Catalog Number: PROTP37173

### Overview

|              |                                                                                                                                                                                                          |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Name | Human TGF-beta RII Recombinant Protein                                                                                                                                                                   |
| Description  | Human TGF-beta RII Recombinant Protein expressed in Baculovirus with hlgG-His-tag. Sequence domain: 23-166aa. Application(s): SDS-PAGE. Endotoxin: < 1 EU per 1ug of protein (determined by LAL method). |
| Size         | Starting from 10ug                                                                                                                                                                                       |
| Tag          | hlgG-His-Tag                                                                                                                                                                                             |
| Form         | Liquid                                                                                                                                                                                                   |
| Source       | Baculovirus                                                                                                                                                                                              |
| Formulation  | Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol                                                                                                                                               |

### Concentration

0.5mg/ml (determined by absorbance at 280nm)

### Storage

Can be stored at 2°C to 8°C for 1 week. For long-term storage, aliquot and store at -20°C to -80°C. Avoid repeated freeze-thaw cycles.

### Purity

> 95% by SDS-PAGE

### Amino Acid Sequence

Human, P37173, 23-166aa; TIPPHVQKSV NNDMIVTDNN GAVKFPQLCK FCDVRFSTCD NQKSCMSNCS ITSICEKPQE VCVAVWRKND
