| Product Name | Rat APRIL Recombinant Protein                                                                                                                                                                                                                                                                                                               |
| Description  | A proliferation-inducing ligand (APRIL), also known as TNFSF13, is a member of the tumor necrosis factor (TNF) ligand superfamily. APRIL/TNFSF13 has been shown to play a role in protecting cells from undergoing apoptosis and promoting B cell development. Rat APRIL Recombinant Protein is purified APRIL (TNFSF13) produced in yeast. |
| Size         | 5 µg/vial                                                                                                                                                                                                                                                                                                                                   |
| Tag          |                                                                                                                                                                                                                                                                                                                                             |
| Form         | Lyophilized                                                                                                                                                                                                                                                                                                                                 |
| Source       | Yeast                                                                                                                                                                                                                                                                                                                                       |
| Formulation  | Lyophilized without carrier protein.                                                                                                                                                                                                                                                                                                        |

## Concentration

## Storage

Store at -20°C for one year. Avoid repeated freeze-thaw cycles.

## Purity

Ion-exchange chromatography.

## Biological Activity and Protein Authenticity

In testing.

## Amino Acid Sequence

AVLTQKHKKK QSVLHLVPIN ITSKADSDMT EVMWQPALRR GRGLEAQGDT VRVRDTGIYL LYSQVLFHDV TFTMGQVVSR EGQGRRETLF
