

CD19

Mouse Anti-Human CD19 (Clone B-C3) Azide Free mAb

Catalog No.	CDM156	Quantity:	200 µg
Alternate Names:	B4, CVID3		
Description:	<p>The azide-free monoclonal antibody recognizes Human CD19. Lymphocytes proliferate and differentiate in response to various concentrations of different antigens. The ability of the B cell to respond in a specific, yet sensitive manner to the various antigens is achieved with the use of low-affinity antigen receptors. CD19 is a cell surface molecule which assembles with the antigen receptor of B lymphocytes in order to decrease the threshold for antigen receptor-dependent stimulation.</p>
