

CD8A

Mouse Anti-Human CD8 (Clone B-Z31) Azide Free mAb

Catalog No.	CDM250	Quantity:	200 µg
Alternate Names:	CD8a; Leu2; MAL		
Description:	The monoclonal antibody recognizes CD8, a 32-34 kDa protein. The CD8 antigen is a cell surface glycoprotein found on most cytotoxic T lymphocytes, and acts as a coreceptor with the T-cell receptor to recognize antigens displayed by an antigen presenting cell in the context of class I MHC molecules. The coreceptor functions as either a homodimer composed of two alpha chains or as a heterodimer composed of one alpha and one beta chain.		
Concentration:	1.0 mg/ml		
Gene ID:	925		
Conjugate:	Unconjugated		
Specificity:	Recognizes the human T-cell coreceptor, CD8, a 32-34 kDa protein.		
Host:	Mouse		
Isotype:	IgG2a		
Immunogen:	Crude thymus membrane fraction		
Clone:	B-Z31		
Formulation:	Phosphate-buffered saline. Sterile-filtered. Carrier and preservative free.		
Purification:	Protein A affinity chromatography		
Applications:	Immunohistochemistry		
Application Notes:	Recommended dilution 1:50. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Stable at 2-8°C for 1 year. For longer storage, freeze in aliquots at -20°C to -80°C. Avoid repeated freeze-thaw cycles.		

A typical staining pattern with the B-Z31 monoclonal antibody of lymphocytes

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
