

IL10

Mouse Anti-Human IL-10 (Clone B-S10) Azide Free mAb

Catalog No. CDM270 **Quantity**: 500 μg

Alternate Names: Interleukin 10, CSIF, TGIF, GVHDS, IL10A

Description: The monoclonal antibody recognizes human IL-10, a cytokine produced primarily by

monocytes and to a lesser extent by lymphocytes. This cytokine has pleiotropic effects in immunoregulation and inflammation. It down-regulates the expression of Th1 cytokines, MHC class II Ags, and costimulatory molecules on macrophages. It also enhances B cell survival, proliferation, and antibody production. This cytokine can block NF-kappa B activity, and is involved in the regulation of the JAK-STAT signaling pathway.

Gene ID: 3586

Concentration: 1.0 mg/ml

Conjugate: Unconjugated

Specificity: Recognizes both natural and recombinant human IL-10.

Host: Mouse

Isotype: IgG1

Immunogen: Recombinant Human IL-10

Clone: B-S10

Biological Activity: Blocks IL-10 induced proliferation on MC/9 cell line.

Formulation: Liquid in PBS. Sterile filtered and treated to remove endotoxins. Carrier and preservative

free.

Applications: Functional Studies

Application Notes: Blocks IL-10 induced proliferation on MC/9 cell line. The optimal concentration should be

determined by the user for each specific application.

Storage & Stability: Stable at 2-8°C for one year. For longer storage, freeze in working aliquots at -20 to -80°

C. Avoid repeated freeze-thaw cycles.

NOT FOR HUMAN USE. FOR RESEARCH ONLY, NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
