

IL15

Mouse Anti-Human Interleukin-15 (Clone B-E29) Azide Free mAb

Catalog No.	CDM282	Quantity:	500 µg
Alternate Names:	IL-15		
Description:	The monoclonal antibody recognizes human Interleukin-15 (IL-15), a cytokine that regulates T and natural killer cell activation and proliferation. IL-15 and IL-2 share many biological activities; both bind common hematopoietin receptor subunits, and may compete for the same receptor, and thus negatively regulate each other's activity. The number of CD8+ memory cells is shown to be controlled by a balance between IL-15 and IL-2. Studies of the mouse counterpart suggested that IL-15 may increase the expression of apoptosis inhibitor BCL2L1/BCL-x(L), possibly through the transcription activation activity of STAT6, and thus prevent apoptosis.		
Concentration:	1 mg/ml		
Gene ID:	3600		
Conjugate:	Unconjugated		
Specificity:	Native and Recombinant Human IL-15		
Host:	Mouse		
Isotype:	IgG1		
Immunogen:	Recombinant Human IL-15		
Clone:	B-E29		
Formulation:	Liquid in PBS. Sterile filtered and treated to remove endotoxins. Carrier and preservative free.		
Purification:	Ion-exchange chromatography		
Applications:	Functional Studies		
Application Notes:	Blocks IL-15 induced proliferation on Kit 225 cell line. Recognizes the soluble antigen. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Store at 2-8°C for up to one year. For longer term, store in working aliquots at -20°C to -80°C. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
