

## CD2 Mouse Anti-Human CD2/LFA-2 (Clone B-E2) FITC mAb

Catalog No.	CDM352	Quantity:	100 tests
Alternate Names:	SRBC, T11		
Description:	The monoclonal antibody recognizes human CD2, a surface antigen of the human T- lymphocyte lineage that is expressed on all peripheral blood T cells. It is one of the earliest T-cell markers, being present on more than 95% of thymocytes; it is also found on some natural killer cells but not on B lymphocytes. Monoclonal antibodies directed against CD2 inhibit the formation of rosettes with sheep erythrocytes, indicating that CD2 is the erythrocyte receptor or is closely associated with it.		
Concentration:	100 tests/ ml		
Gene ID:	914		
Conjugate:	FITC		
Specificity:	Recognizes the human Lymphocyte Function associated Antigen-2 (LFA-2), a 50 kDa protein.		
Host:	Mouse		
Isotype:	lgG2b		
Immunogen:	Human thymocytes		
Clone:	B-E2		
Formulation:	Liquid in PBS with 1 % BSA poisonous and hazardous su		. Precaution: Sodium azide is a e handled by trained staff.
Purification:	Ion exchange chromatography		
Applications:	Flow Cytometry		
Application Notes:	Use 10 $\mu$ I to label 10 <sup>6</sup> cells or 100 $\mu$ I of whole blood. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Stable at 2-8°C for 12 month Avoid repeated freeze-thav	• •	eeze aliquots at -20°C to -80°C.

A typical staining pattern with the B-E2 monoclonal antibody of lymphocytes
