

CCL26

Mouse Anti-Human Chemokine Ligand 26 mAb

Catalog No.	CME110	Quantity:	500 µg
Alternate Names:	Eotaxin 3, MIP4-alpha, IMAC, TSC-1, SCYA26		
Gene ID:	10344		
Description:	Mouse Anti-Human CCL26 monoclonal antibody		
Specificity:	Recognizes human CCL26		
Host:	Mouse		
Immunogen:	Recombinant human CCL26		
Isotype:	IgG1/κ		
Formulation:	Lyophilized		
Purification:	Protein A chromatography		
Reconstitution:	Centrifuge vial prior to opening. Add sterile distilled water to the vial to fully solubilize the antibody to a concentration 1.0 mg/ml.		
Applications:	ELISA Neutralization		
Application Notes:	For ELISA, the antibody can be used at a concentration of 1-2 µg/ml, as a capture antibody in conjunction with a compatible secondary reagent to yield satisfactory results. For Neutralization, requires a concentration of 1-5 µg/ml of antibody to yield one-half maximal inhibition [ND50] of the biological activity of human CCL26 (2 µg/ml). The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Lyophilized antibody is stable for greater than one year at -20°C. Reconstituted antibody is stable for at least six weeks at 2-4°C. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
