

Anti-Mouse Interleukin-12 (IL-12), clone 17.15 Biotinylated Detection Antibody (Monoclonal)

Catalog No:	CMI156
Size:	100 µg
Concentration:	0.1 mg/0.2 mL
Clone Number:	17.15
Isotype:	Rat IgG2a
Formulation:	Biotinylated purified immunoglobulin in phosphate buffered saline, pH 7.2, with 1% bovine serum albumin and 0.1% sodium azide.
Purification:	Purified from ascites by Protein A/G affinity chromatography.
Specificity:	Recognizes natural and recombinant mouse IL-12.
Applications:	ELISA as a detecting antibody. Intended for use with Cell Sciences capture antibody CMI119. A general ELISA protocol is available upon request or may be accessed online at http://www.cellsciences.com/PDF/ELISA.pdf .
Recommended Dilutions:	Centrifuge vial briefly before opening to bring contents to bottom of vial. Just prior to use in ELISA, dilute this preparation to a concentration of 0.1 – 1.0 µg/mL in an appropriate buffer, and pipette 50-100 µL into the wells of a microtiter plate. Dilutions should be made in a buffered solution containing a carrier protein (e.g., 0.1 – 1.0% BSA). The optimal antibody concentration should be determined for each specific application.
Storage:	Store at 2-8°C.

NOT FOR HUMAN USE. FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC OR THERAPEUTIC PROCEDURES.
