

Goat Anti-Rabbit Ig (Ads) Biotin

Catalog No.	CPB011	Quantity:	1.0 mg
Description:	Goat Anti-Rabbit Ig (Ads) Biotin. Pooled antisera from goats hyperimmunized with normal rabbit IgG. Cross adsorbed on pooled human sera and purified human paraproteins. Purified by affinity chromatography on rabbit IgG and IgM covalently linked to agarose.		
Concentration:	500 µg/mL		
Specificity:	Reacts with the heavy and light chains of rabbit IgM and IgG as demonstrated by ELISA, FLISA, and/or flow cytometry.		
Isotype:	Goat IgG		
Conjugate:	Biotin		
Formulation:	Liquid volume of 2.0 mL in a buffer of PBS/NaN ₃		
Isotype Control:	Goat IgG-BIOT		
Cross-Reactivity:	Minimal cross reactivity with human immunoglobulins; may react with other species		
Applications:	ELISA, Flow Cytometry, Immunocytochemistry, Immunohistochemistry, Western Blotting.		
Application Notes:	Working dilution for ELISA 1:5,000 - 1:20,00, Flow Cytometry ≤ 1 µg/10 ⁶ cells. Since applications vary, you should determine the optimum working dilution for the product that is appropriate for your specific need.		
Storage & Stability:	Store at 2-8°C. □ For long term storage at -20°C, aliquot into smaller volumes to avoid multiple freeze/thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
