

BCL2L13

Rabbit Anti-Mouse BCL2-Like 13 Affinity Purified pAb

Catalog No.	CPB110	Quantity:	100 µg
Alternate Names:	Bcl-rambo, MIL1		
Gene ID:	94044		
Description:	Rabbit Anti-Mouse BCL2L13 Affinity Purified polyclonal antibody. BCL2L13 shares the common structural characteristics with other members of the antiapoptotic BCL2 family members, but differs from them at its C-terminus, where a 250 amino acid sequence proceeds the membrane anchor region. It also differs from other pro-apoptotic BCL2 family members in that its membrane anchor C-terminus region is responsible for its apoptotic activity, not its BCL2 homology motifs.		
Concentration:	0.2 mg/ml		
Specificity:	Recognizes ~56 kDa band in samples from human, mouse, and rat origins		
Host:	Rabbit		
Immunogen:	Synthetic peptide corresponding to residues surrounding amino acids 421 of mouse BCL2L13		
Formulation:	Liquid in PBS + 0.1% BSA + 30% glycerol + 0.01% thimerosal. Precaution: Thimerosal is a poisonous and hazardous substance which should be handled by trained staff only.		
Purification:	Biospecific affinity chromatography		
Cross-Reactivity:	Reacts with human, mouse, and rat.		
Applications:	Western Blot		
Application Notes:	For Western Blot, use a working dilution of 0.5-4 µg/ml. Blocking Peptide (Cat. No. CPB110BP) is available separately. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Store at 2-4°C for short term storage or in working aliquots at -20°C to -80°C for long term storage. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
