

## SERPINF2

### A2AP, Rabbit Anti-Human Alpha-2-AntiPlasmin pAb

<b>Catalog No.</b>	CSI19725A CSI19725B	<b>Quantity:</b>	1.0 mL 10 mL
<b>Description:</b>	Alpha 2-AntiPlasmin (A2AP) is a serine protease inhibitor (serpin) responsible for inactivating plasmin, an important enzyme that participates in fibrinolysis and degradation of various other proteins. This protein is encoded by the SERPINF2 gene.		
<b>Concentration:</b>	Whole Antiserum		
<b>Volume:</b>	1.0 mL		
<b>Host:</b>	Rabbit Serum		
<b>Formulation:</b>	Frozen Liquid		
<b>Applications:</b>	ELISA, WB. The optimal concentration should be determined by the user for each specific application.		
<b>Storage &amp; Stability:</b>	Store at -70°C.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
